DUTY > POLYMER CAMA HOLSTERS

series
DCX8 "CAMA X"

PROFESSIONAL INJECTION MOLDED POLYMER HOLSTER
Double safety system of which one locks the upper part of the weapon and a lower safety system which acts on the trigger guard and automatically activates when the weapon is inserted in the holster.
Both systems can be released either individually or simultaneously using a lever on the inside of the holster, operated with the thumb in a "BACK & GO" movement.
Retention screw for adjusting the friction of the holster on the weapon.
Belt loop with double slots and adjustment of belt passage from 5 cm to 6 cm, grip position on the belt line.
It can be mounted on all Vega Holster loops and kits.

AVAILABLE FOR
-Glock 17/18/19/22/23/31/32/45/47 -Sig Sauer P320 Full Size/Compact/M17/M18

SAFETY GRADE 2 not for all models

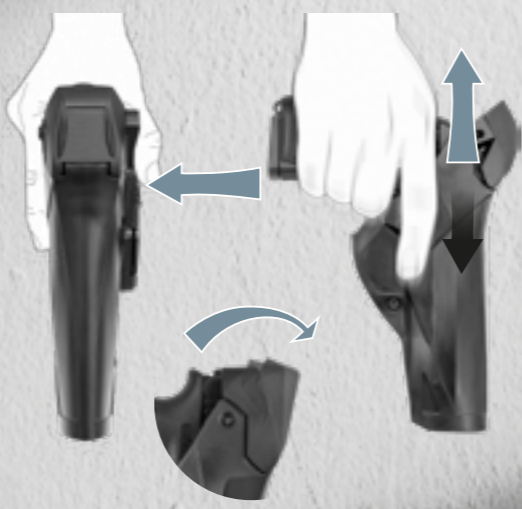

series **DCA8** "ONE FOR TWO"

PROFESSIONAL INJECTION MOLDED POLYMER HOLSTER
Retention screws and multi friction polymer spring.
The thumb releases the double safety mechanism: the first one works on the pistol upper part; the second one works directly on the trigger guard.
Possibility to close the bottom opening.
Belt loop with double slots, adjustable height and angle.
It can be mounted on all Vega Holster loops and kits.

AVAILABLE FOR
Beretta 92/98 Fs, - Beretta 92 A1, -Glock 17/19/22/23/31/32/45/47

DOUBLE SAFETY THUMB RELEASE LEVER

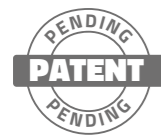

series **DAA8** "ACE"

PROFESSIONAL INJECTION MOLDED POLYMER HOLSTER
"Push & Front" upper safety system uses a swivel strap acting on the upper part of the weapon, releasable by means of a downward and then forward movement of the thumb.
"Front Stop" safety system, acting on the ejection hole, releasable by means of a lever located on the inside of the holster, thumb-operated in a natural rear movement.
Retention screw for adjusting the friction of the holster on the weapon.
Belt loop with double slots and adjustment of belt passage from 5 cm to 6 cm, grip position on the belt line.
It can be mounted on all Vega Holster loops and kits.

AVAILABLE FOR
-Glock 17/18/19/22/23/31/32/45/47 -H&K USP Compact -Sig Sauer P320 Full Size/Compact/M17/M18

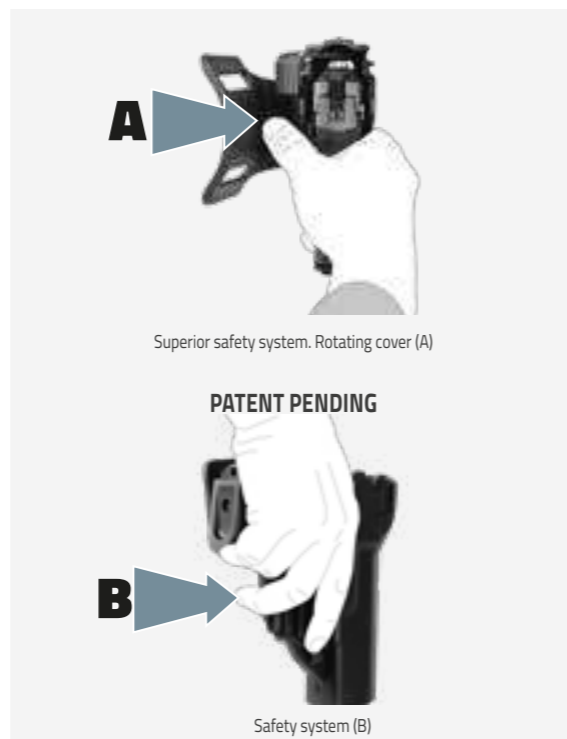

series **SHWD8** "SHOCKWAVE"

HOLSTER SUITABLE FOR UNIFORM OR TACTICAL PROFESSIONALS USES
 Made in special injection molded polymer. The double safety mechanism gives to the operator the possibility to put the firearm in maximum safety, useful during dangerous situations like riots, revolts, sport events and, with the opportunity to remove the superior safety system A and to have always the security system of the trigger guard locked. The firearm is at safety but at the same time it is ready to be use thanks to easy unlocked. The conformation of the two safety mechanisms (that use the thumb and medium Finger) allows the simultaneous unlocking of them (good training is recommended before used).
 A) Patented superior semiautomatic safety mechanism with an internal rotating cover (this unique rotation avoids the risk of locking that can be verified with frontal or external rotation).
 B) Patented automatic safety mechanism on the trigger guard.
 When the Pistol is inserted in the holster the safety automatically is activated. To release the Firearm, push on the lever under the Pistol grip, with the Middle finger in natural position.
 Retention screw on the barrel.
 It can be mounted on all Vega Holster loops and Kit.

AVAILABLE FOR
Beretta 92/96/98/ 31/32/45/47 -**Glock** 17/19/22/23/31/32/38/3 -**H&K** USP Standard, USP Compact -**Sig Sauer** 2022

series **SHWP8** "POLICE-INJECTION"

HOLSTER FOR TACTICAL OR PROFESSIONAL USE IN UNIFORM
 In special polymer, with injection-molded increased thickness. The safety system with upper swivel strap means the operator can keep his weapon safe in any situation but also ready to use thanks to the fast opening swivel system requiring mere pressure of the thumb and frontward rotation. The holster is fitted with a "SAFETY GUARD" which prevents the safety catch from getting tangled in clothing or equipment and protects it from potential aggressors. The holster is fitted with a retention screw to adjust the retention of the weapon in the holster even with the safety catch not on. Compatible with all Vega Holster Belt loops and platforms kits.

AVAILABLE FOR
 -Walther PPQ, P99Q

series **SHWG8** "GUARDIAN-INJECTION"

HOLSTER FOR TACTICAL OR PROFESSIONAL USE
 Holster in special polymer injection molding, suitable for uniformed professionals and tactical operators. The security system is the result of the combination of two mechanisms from "Vega Push Down" and "Vega Automatic Push and Go". These two systems work simultaneously, providing the operator maximum safety, but, at the same time, in case of necessity, a quick draw in one single motion.. An adjustable retention screw assures perfect weapon stability in the holster.

AVAILABLE FOR
 -Taurus PT24/7 old gen. and -Taurus PT809

series **VKG8** "VEGATEK GUARDIAN"

PROFESSIONAL DUTY AND LAW ENFORCEMENT HOLSTER
The Safety Mechanism it is the union of two different mechanism "Vega Push Down" and "Vega Automatic Push and Go", these two systems work together and give the maximum safety to the operator but at the same time in case of necessity the draw it so fast with only one movement. Full protection of the firearm. High resistant polymer. Internal cover for better protection of the firearm and less noise emission. Compatible with all Vega Holster Belt loops and platforms kits.

AVAILABLE FOR
Beretta 92/96/98/PX4 -Glock 7/19/22/23/31/32/37/38/ 31/32/45/47
-H&K USP Standard, USP Compact, P30 -Sig Sauer 2022 -Walther P99 last edition

SAFETY GRADE 3 APG PD

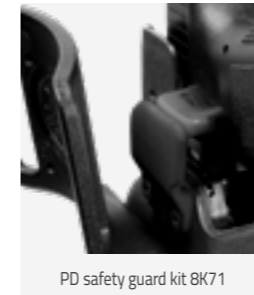

series **VKE8** "VEGATEK EXTREME"

DUTY HOLSTER WITH EXCELLENT SAFETY SYSTEM
Excellent safety System VEGA PUSH DOWN which is automatically activated when the firearm is inserted in the holster and released with an easy and natural lever push action. Open on the top for a better fast draw. Full protection of the firearm. High resistant polymer. Internal cover for better protection of the firearm and less noise emission. Double holes belt loop included. Compatible with all Vega Holster Belt loops and platforms kits.

AVAILABLE FOR
Beretta 92/96/98/PX4 -Glock 17/19/22/23/31/32/37/38/45/47 -H&K Standard, USP Compact, P30 -Sig Sauer 2022

SAFETY GRADE 2 PD

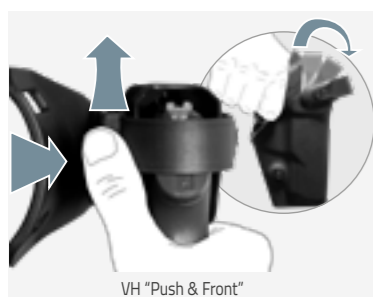

series **VKT8** "VEGATEK TOP"

PROFESSIONAL HOLSTER
Vegatek thermo - molding, internal soft lining for better protection of the firearms and less noise emission. Triple safety system: the first easy action safety system on the top; the second Vega Pull Side which is automatically activated when the firearm is inserted in the holster and released with an easy and natural hand's move, on it there is the possibility to insert a further level of locking safety to increase the safety grade. Retention screw on the barrel. Compatible with all Vega Holster Belt loops and platforms kit.

AVAILABLE FOR
Beretta 84/92/96/98/PX4/ APX -Glock 17/19/22/23/31/32/37/38/45/47 -H&K VP9/SFP9, P30, USP Standard, USP Compact -Sig Sauer 2022 -Tanfoglio Police, Pro -Walther P99 last edition

SAFETY GRADE 4

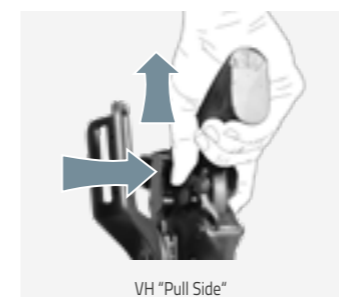

series **VKP8** "VEGATEK PRO"

DUTY HOLSTER
Holsters with excellent belt-loop system and a safety system which is automatically activated when the firearm is inserted in the holster and released with an easy and natural hand's move. It's possible to insert a further level of locking safety. Full protection of the firearm. High resistant polymer. Internal cover for better protection of the firearm and less noise emission. VEGA PULL SIDE automatic safety system. VEGATEK thermo-moulding. Compatible with all Vega Holster Belt loops and platforms kits.

series **VKWM8** "VIRIDIAN LIGHT"

THERMO MOLDED POLYMER HOLSTER WITH LINING INSIDE

An internal special mechanism allows the VIRIDIAN Light to switch on when the gun is released and to switch off when the gun is inserted. Safety retention level II. Adjustable Retention screws. The Thumb releases the rotating safety lace, a small Catch can stop the rotating lace action. Duty Belt loop with double slots and adjustable angle. It can be mounted on all Vega Holsters belt loops and kit.

AVAILABLE FOR
-Glock 17/22 with Viridian X5L/X5L-R

series **VKW8** "VEGATEK WARRIOR"

FOR DUTY AND TACTICAL OPERATORS

Special thermo-molded polymer holster, suitable for Duty and tactical operators. Inner lining to provide greater weapon safety and sound-free handling. Upper safety system with rotating lace. It can be used with or without internal shield (both components are included). Retention screws on barrel.

Compatible with all Vega Holster Belt loops and platforms kit.

AVAILABLE FOR
-Glock 17/19/22/23/31/32/37/38/45/47 with Stremlight LT1 and LT2 -FN Herstal FNS9 with Surfire X300

series **VKZ8** "ZOOM"

PROFESSIONAL THERMO MOLDED POLYMER HOLSTER FOR WEAPONS WITH FLASHLIGHT

Easy action safety system on the top. Retention screw on the lower part of the pistol. Two adjustable parts in rubber and cordura at the point of the trigger guard according to the model of flashlight or/and laser mounted on the pistol. Compatible with all Vega Holster Belt loops and kit.

AVAILABLE FOR
-Glock 19/22/17/23/18/31/32/45/47 and similar with Flashlight or Laser -Sig Sauer P220/22 -Springfield XDM all With Laser or Light 6

series. **VUH8** "UNIVERSAL"

VEGA UNIVERSAL PISTOL/LIGHT HOLSTER

Polymer injection molded holster with internal adjustment to accommodate different types of weapons equipped with different types of torches/lasers. The holster is mounted with a lock system which automatically activates when the weapon is placed in the holster. The weapon disengages by placing the thumb on the lever situated at the rear end. The holster has removable frontal protection for greater front protection. The lower side incorporates a retention screw for slightly adjusting friction from the holster onto the gun. The holster is mounted on a standard polymer injection molded loop kit for police and/or law enforcement use. It can be mounted on all Vega Holster loops and kits.

AVAILABLE FOR
All the most common Large Auto and Large Auto Compact mounted with the most common flashlights/lasers on the market (verify weapon and flashlights compatibility with the holster before purchasing)

series
DTC8 "TASER ONE FOR TWO"

INJECTION POLYMER HOLSTER
Retention screws and multi friction polymer spring. The index releases the double safety mechanism, the first one works on the pistol upper part and the second one works directly on the weapon stem. Openable belt loop, adjustable height and angle. It can be mounted on all Vega Holster loops and kit.
International Patent
Available: right.

AVAILABLE FOR
-Taser X26P

series
DTCS8 "SEVEN HOLSTER"

PROFESSIONAL HOLSTER IN INJECTION MOLDED POLYMER
ASPF™ upper safety system adjusted by a swivel strap acting on the upper part of the weapon, releasable by means of a downward and then forward movement of the thumb. Retention screw for improved friction of the holster on the weapon.
The loop, which can be opened and adjusted in inclination and height, holds the holster close to the body with the grip above the centre line of the belt. It is also suitable for mounting on MOLLE type belts and supports.
It can be mounted on all Vega Holster loops and kits.

AVAILABLE FOR
-Taser 7

series
VNL8 "N.L.W."

THE CHOICE OF A CARRYING SYSTEM BASED ON ONES OPERATIONAL ROUTINE AND NEEDS IT'S THE FIRST STEP TO HAVE THE IDEAL HOLSTER.

cod. **8K24**
INJECTION MOLDED SPECIAL POLYMER BELT LOOP
 Double holes for belt of 60 mm. Maximum height. Rotative system with more positions: vertical, inclined and semifixed 90° useful in the car. Multi-holes to adjust height and inclination with screws.

cod. **8K25**
INJECTION MOLDED SPECIAL POLYMER BELT LOOP
 Opening system on the two loops to wear or remove easily the Shockloop from the belt. Possibility to lock the opening system. Rotative system with more positions: vertical, inclined and semi-fixed 90°, useful in the car. Multi-holes to adjust height and inclination with screws.

cod. **8K43**
COMPACT ROTATING BELT LOOP
 Adjustable belt slots. For belt up to 6 cm high. High position, holster grip on the middle belt line. The system allows a rotation of small angle for a better draw and a 90° rotation to be used in the car. The lever for adjusting the angles is on the sides.

cod. **8K44**
COMPACT ROTATING BELT LOOP
 Compact rotating belt loop middle lever. Polymer injection molded loop. The double eyelet with adjustable height allows use of belts up to 6 cm high. In vertical position, the weapon grip is above the center line of the belt. The kit allows rotation of the holster in a slightly tilted position and in a horizontal position. The lever for adjusting the angle is in a central position.

cod. **8K23**
INJECTION-MOLDED SPECIAL POLYMER BELT LOOP
 Double holes for belt of 60 mm. Maximum height. Multi-holes to adjust height and inclination with screws. Included in all Schockwave and Vegatek holsters, see the duty section.

cod. **8K40**
INJECTION MOLDED POLYMER PROFESSIONAL LOOP
 60 mm belt loop height with slots for 3 different positions (straight, front cant, cross-draw), high position.

cod. **8K41**
POLYMER STANDARD DUTY BELT LOOP
 That keeps the pistol distant from the body for tactical vest or body armor use. Adjustable belt slots for 6 cm height at maximum. Standard position, holster grip remains in the middle belt line.

cod. **8K42**
POLYMER LONG DUTY BELT LOOP
 That keeps the pistol distant from the body for tactical vest or body armor use. Adjustable belt slots for 6 cm height at maximum. Lower position, holster grip remains under the middle belt line.

cod. **8K90**
RUBBER COMFORT KIT FOR BELT LOOPS 8K41 AND 8K42
 The system mounted on the rear part of the belt loop system allows a better stability and comfort on the hip. Removable.

DUTY BELT LOOPS WITH FLAT SHAPE PROFILE

cod. **8KF01**
SHORT FLAT SHAPE DUTY BELT LOOP
 Flat shape" loop, in injected polymer, belt height adjustment bar, flexible tabs, tilt adjustment

cod. **8KF02**
STANDARD FLAT SHAPE DUTY BELT LOOP
 Flat shape" loop, in injected polymer, belt height adjustment bar, flexible tabs, tilt adjustment

cod. **8KF03**
ROTATING FLAT SHAPE DUTY BELT LOOP
 "Flat shape" rotating loop, in injected polymer, belt height adjustment bar, flexible tabs, tilt adjustment lateral lever, positions 0°, 10°, .90°.

cod. **8KF00**
MULTI-LENGTHS FLAT SHAPE DUTY BELT LOOP
 Multi-height, "flat shape" loop, in injected polymer, belt height adjustment.

cod. **8K22**
SQUARE DUTY BELT LOOP
 Injection molded polymer, ideal to use with 8K31 and 8K35 Kit (pag. 27).

DUTY > BELT LOOPS

cod. **8K21**

INJECTION-MOLDED SPECIAL POLYMER BELT LOOP
To wear the firearm near the body. Adjustable double holes for belt of 60 mm. Maximum height. Multi-holes to adjust height and inclination with screws.

H+1

cod. **8K26**

POLYMER BELT LOOP TO WEAR THE FIREARM NEAR THE BODY
Injection molded special polymer belt loop to wear the firearm near the body. Adjustable double holes for belt up to 60 mm high. Multi-holes to adjust height and inclination with screws.

H+1

cod. **8K27**

INJECTION MOLDED SPECIAL POLYMER PADDLE LOOP TO WEAR THE FIREARM NEAR THE BODY
Adjustable system in height for belt of 50mm. maximum height. Multi-holes to adjust height and inclination with screws.

H+1

cod. **8K85**

UP&DOWN BELT PLATFORM
Allowing for extreme comfort thanks to its flexibility and shape. Adjustable belt loops through double barrels, slots for three different positions (straight, front cant, cross-draw). Two carrying options: high (under the shoulder), or low (below the waist). Compatible with rotating system accessories for simultaneous use on the same platform.

H+2/-2

cod. **8K82**

MULTIPURPOSE ADJUSTABLE LOOP
Which can be opened and adjusted in height and cant through a series of slots. Belt adjustable height, lock with Safety system.

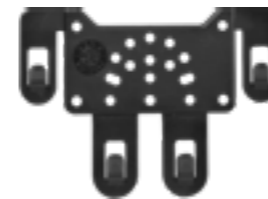

H+1

DUTY > BELT LOOPS

cod. **8K29**

POLYMER MODULAR PLATFORM
To attach the holster and accessories on tactical vest, rucksacks, thigh platform with molle system.

cod. **8K89**

KIT FOR MOLLE TYPE SUPPORTS
4 positions for polymer accessories with toothed wheel.

cod. **8K83**

ROTATING COMPACT MOLLE KIT
Allow the angle adjustment by screw.

cod. **8K87**

OPENABLE MULTI USE LOOP
Compatible with both duty belts and Molle system.

H+1

cod. **8K99**

TRIANGULAR WEDGE THICKNESS
To distance and incline the holster compared to the standard support.

cod. **8K98**

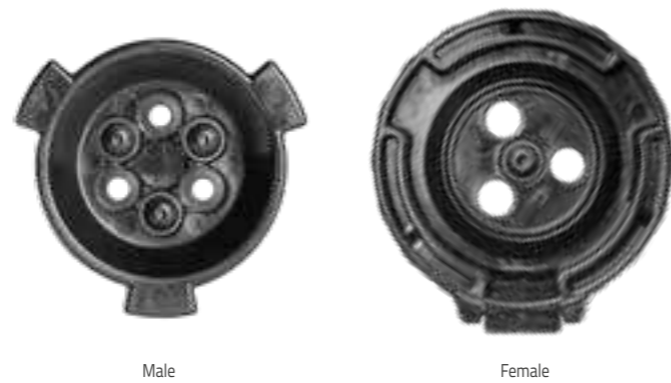

TRIANGULAR THICKNESS 5MM
To distance the holster compared to the standard support.

cod **8K33** "WHEEL ATTACH. SYSTEM"

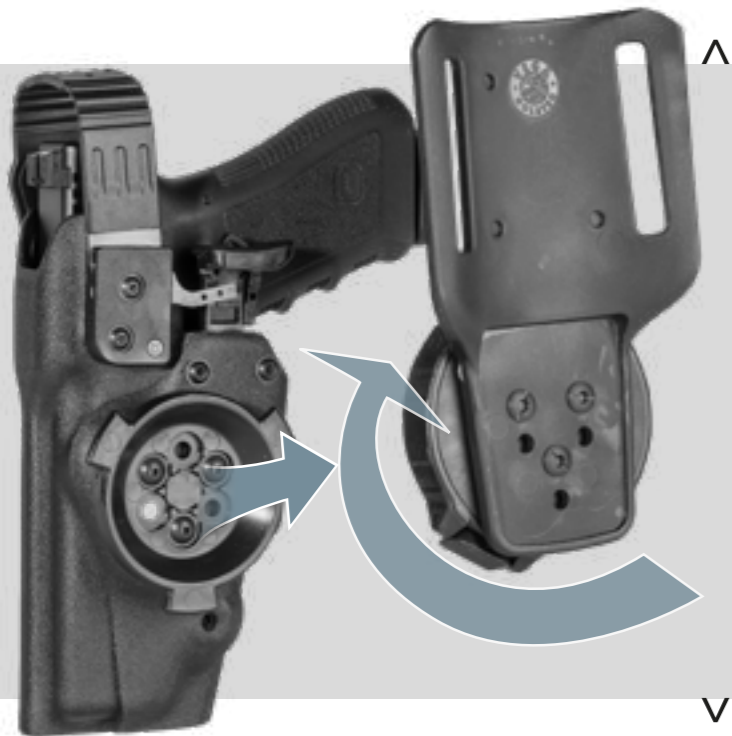

MODULAR RAPID CONNECTION AND ROTATING SYSTEM

Male part can be mounted on the holster (compatible with all Vega polymer holsters). Female part can be mounted on every Vega Holster belt loops, thigh kits or Molle platforms. The two parts can be mounted on several holsters and different platforms so to change the position of the pistol quickly, also during an operative mission. The system allows a 360° rotation without any lever action.

Male

On MOLLE support

On thigh platform

cod **8K34** "W.A.S.F - WHEEL ATTACH. SYSTEM FLAT"

MODULAR QUICK COUPLING AND TILT ADJUSTMENT SYSTEM

The system is composed of a male part to be screwed/fixated to any Vega Holster polymer holster and a female counterpart to be fixed on any thigh support, MOLLE kit or Vega Holster loop system. Multiple parts (both female and male) can be attached to multiple holsters or supports, so that the positions of the weapon can be changed quickly even during a mission. The two, joined parts lock together by simply pressing and moving forward. Multiple holes allow different inclinations.

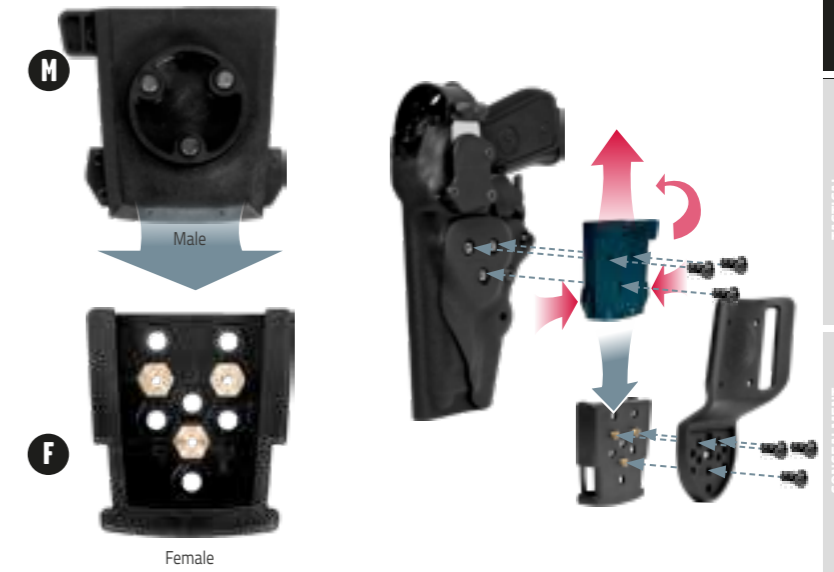

Male (Low profile)

Female (Low profile)

cod **8K31** "R.D.Q.A."

MODULAR MULTI-FUNCTION SYSTEM

The RDQA system allows you to connect or disconnect your holster from a belt loop, a thigh or a Molle platform. The system consists in two parts, the male one (M) mounted on the holster and the female one (F) mounted on a belt loop, a thigh or a Molle platform. Inserting (M) inside (F), they lock together. To disconnect you only have to push towards inside on the bottom parts (E and D), using thumb and index, and let move the holster upwards. On the surface of the female part there are many holes to allow you to change the angle and the high. With lever (G) you can change the angle of the holster choosing among straight, inclined or horizontal (car using) position.

VEGA GLOVES FEATURES

ANTI CUT LINING

Many models for Duty and Law Enforcement uses have a CUT RESISTANCE inside lining with different protections levels. Vega holster use for their Gloves the most innovative and high performance material/fabrics as Dynema, Spectra, Kevlar Shark Skin and sign the protection level with a scale that goes from a medium Level to a Level 5, the maximum on the normative EN388. All gloves with anti-cut lining have more or less cut resistance degree but any of them can guarantee a 100% protection.

Medium cut resistance

Good cut resistance.

Optimal cut resistance at level 5 according on European Regulation CEEN388

Puncture and needles high resistance inside lining.

TOF System (Turn on the Fingers)

It is a special construction of the glove that turns around the final part of the fingers and ends with the junction on the dorsal part of the same; such system favors sensitivity and attenuates the annoyance that standard construction can give in this point.

OSH (Molding on the shape hand)

When the hand is in its natural position it does not have a straight shape but is slightly bent towards the closing, such a molding does not force the position of the hand because it accommodates the natural position, moreover it facilitates the grip of arms, instruments, objects etc.

Neoprene Wrist with VH rubber lace

The construction of the inferior part of the glove in this material gives greater protection to the external part of the wrist (that is mainly subject to hits), the one which it gives greater adhesion and stability thanks to its elastic characteristic and to the use of the adjustment by velcro through the lace in printed and injected rubber, compatible with wrist-compass or wrist-thermometer or other similar accessories that have 3 / 4 " watchband passage.

Knuckles protection

During a Police and/or Military operation, the part of the hand that is mainly submitted to contact with walls, ground, blunt objects would be the knuckles of the fingers and of the hand, in this point VH has inserted Polymer or leather or padded leather protection along the destination of use varying on the model of glove.

RING for coupling to port system

This special ring, besides, has the function of coupling for the transport through a shackle on a belt or backpack, it is also useful, thanks to its wide anti-slide surface, to facilitate the placement of a glove when one of the two is already worn.

SIZING GUIDE

Use this method to find your approximate glove size.

SIZING CHART (see pag. 190)

MEASUREMENT	GLOVE SIZE
20 cm (8")	Small
23 cm (9")	Medium
25 cm (10")	Large
28 cm (11")	X-Large

cod.
OG58 "FIT-PRO"

LEATHER AND SYNTHETIC TACTICAL GLOVE
External elastic fabric with special rubber protection insert.
Slip leather on the palm with padded parts on the stress points.
Adjustable rubber wrist lace.
Maximum sensibility.

Sizes: S, M, L, XL.

cod. **OG47** "MONSTER" cod. **OG48** "MONSTER WINTER"

PROFESSIONAL-OPERATIVE GLOVE
First quality suede leather with double reinforce on the palm.
Spandex on the back for a better movements.
Injection rubber reinforce on the knuckles, suede leather reinforce on the fingers final parts.
Rubber adjustment lace on the wrist. Neoprene wrist protection.
MONSTER WINTER with thinsulate and pile inside lining.

Sizes: S, M, L, XL.

cod.
OG21 "TESTUDO MISSION"

PROFESSIONAL GLOVE FOR POLICE, SPECIAL FORCES, MILITARY USES

Chamude synthetic leather palm with double reinforce. 3D knit space fabric and spandex on the back. Hard Polymer protection on the knuckles of the fingers. Hard Polymer protection on the knuckles. Seams with an exorbitant amount of resistance to wear and tear. The index and Thumb fingers imprinted with anti-slide stripes of silicon rubber for greater adhesion on the arm or seized object. Terry Cloth on the back of the thumb. Cuff in Neoprene for greater adhesion and protection.
VH Lace with velcro on the wrist. Ring for coupling to port system.

Sizes: S, M, L, XL, XXL.

cod.
OG45 "ALPHA"

PROFESSIONAL-OPERATIVE GLOVE

First quality leather with double reinforce on the palm.
Neoprene on the back for a better protection from wind, cold temperature and humidity.
Rigid Reinforce on the Knuckles, in two parts for a better movement.
Padded reinforce on the Fingers Knuckles for a better protection.
Leather reinforce on the fingers final parts. Rubber adjustment lace on the wrist.
Neoprene wrist protection.

Sizes: S, M, L, XL.

cod.
OG14 "MOTO CC"

LIGHT GLOVES

In transpiring fabric on top for greater aeration and chamois leather on the palm for greater grip. Knuckle protection with a polymer insert.
High visibility insert, "Police" written (personalized upon request of quantity) on the rubber closing lace with velcro adjustment.

Sizes: S, M, L, XL.

cod.
OG55 "THE MEC"

MULTIPURPOSE GLOVES

In stretch fabric on top. Chamois leather on the palm for greater protection and greater grip. Reinforced with chamois leather on areas prone to greater wear. Rubber lace with Velcro adjustment. Nylon lace for attachment to snap-hooks.

Sizes: S, M, L, XL

cod.
OG41 "COP OVER 5"

ALL USE GLOVE MADE IN SPANDEX, NEOPRENE AND LEATHER

All Use Gloves made in Spandex and Neoprene for knuckles protection on the back and leather on the palm.
No Cut Armortex inside lining that answer to the CE EN 388 Normative with maximum grade of resistance Level 5, ideal for military, law enforcement and search.
Special VH rubber lace for adjustable velcro closure.

Sizes: S, M, L, XL, XXL

cod.
OG71 "JOLLY"

MULTIPURPOSE GLOVE

Padding on the palm for greater comfort in case of prolonged use.
Non-slip silicone inserts for improved grip in any weather situation.
Elastic and neoprene on the back for better adaptability.
Adjustable Velcro closure on the wrist.

Sizes S, M, L, XL, XXL

cod.
OG46 "ESSENCE"

PROFESSIONAL-OPERATIVE GLOVE

First quality leather with double reinforce on the palm.
Neoprene on the back for a better protection from wind, cold temperature and humidity.
Leather reinforce on the fingers final parts.
Rubber adjustment lace on the wrist.
Neoprene wrist protection.

Sizes: S, M, L, XL

GLOVES > TACTICAL AND MILITARY USES

cod. **OG51** "DELTA-L"

TACTICAL GLOVE IN KEVLAR LONG CUFF

Leather reinforcements on back with padding on knuckles, elastic at wrist and end of glove. Leather palm with double reinforcement in areas of most wear and weapon grip areas. Tip of index finger and thumb with special touch screen treatment. Side PATCH in rubber with NON SLIP TANK SYSTEM for resting when pointing. The increased thickness kevlar fabric makes these gloves particularly resistant to abrasion and wear.

Sizes: S, M, L, XL

cod. **OG22** "TESTUDO COMBAT"

PROFESSIONAL GLOVE FOR POLICE, SPECIAL FORCES, MILITARY USE

First quality goat skin with special woven anti-wear treatment. Nomex + kevlar mix for high resistance to heat and abrasion. Hard polymer protection on the knuckles. Forearm External Padded Protection. Seams with an exorbitant amount of resistance to wear and tear. Large adjustment leather band with velcro closure on the wrist. Ring for coupling to port system.

Sizes: M, L, XL, XXL

cod. **OG50** "DELTA-S"

TACTICAL GLOVE IN KEVLAR SHORT

Leather reinforcements on back with padding on knuckles, wrist adjustment lace. Leather palm with double reinforcement in areas of most wear and weapon grip areas. Tip of index finger and thumb with special touch screen treatment. Side PATCH in rubber with NON SLIP TANK SYSTEM for resting when pointing. The increased thickness kevlar fabric makes these gloves particularly resistant to abrasion and wear.

SALES DETAILS

- All Vega Holster products are sold "as they are" and "without defects".
- Returned goods will not be accepted unless previously agreed to the company.
- Customer is responsible for shipping charges unless previously differently agreed.
- Merchandise will be travel at buyer's risk.
- No objections will be accepted after 8 days from the receiving of the goods: any objections will not ensure the right to obtain a compensation.
- Payment will be done as the order agreement.
- Vega Holsters reserves the right to make any modifications to the products which it believes improve them or for commercial or technical reasons without giving any warning to the customers warning to the customers.
- This catalogue is the most complete guide to Vega Holster products at today.
- There is no warranty about colours, sizes, dimensions correspondance.
- For any informations please refers to Vega Holster commercial office.

ORDERING INFORMATION

- To fill right the order it's necessary to insert:**
- item code with descriptions (for holster see the fit chart table)
 - Color
 - Right or left hand
 - For holsters specific name and model of the gun, caliber, size of the barrel (to be measure as indicated)
 - For belts specific size (must be measured as indicated)
 - For gloves specific size (must be measured as indicated)

GLOVES SIZES

MATERIALS AND COLORS

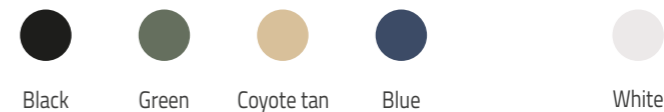

LEATHER

Vega uses only first quality real leather, tanned using vegetable extracts, completely treated in Italy according to the recent international agreements. Leather means from always exclusiveness and value.

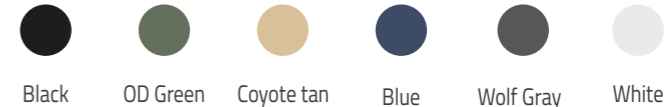

CORDURA - 100% NYLON

Vega uses only original cordura by Dupont; the original cordura Dupont is a highly technological fabric designed to ensure maximum wear and resistance, long life and lightness, particularly suitable in any situation and field.

POLYMER

The Vega Holster polymer is a plastic material, wear and impact high resistance, thermo molding or injection molding, suitable in any situation the most difficult too.

INSTRUCTIONS

LEATHER CARE AND MAINTENANCE

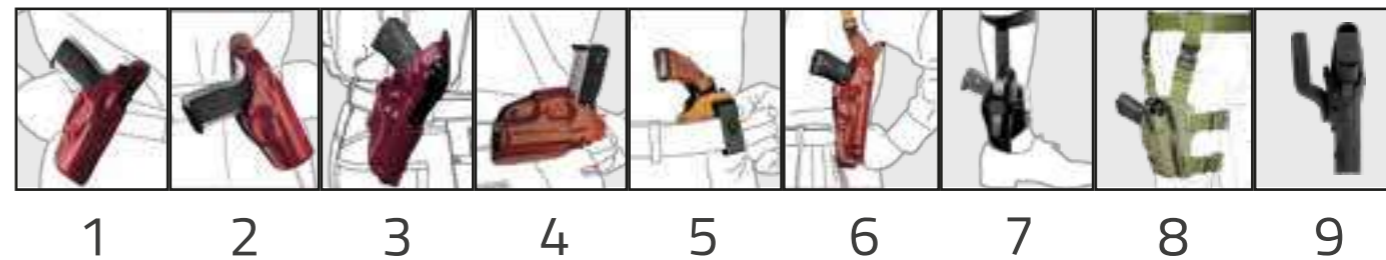

- All Vega Holster leather products will need minimal care and maintenance:
- Clean with a soft cloth and mild soap (don't submerge in water or other liquid)
 - Allow to air dry naturally.
 - You can use a neutral leather cream.
 - Don't use artificial heat to speed up the drying process.
 - Don't use Loctite or others.
 - Don't use solvents or chemical products.

SYNTHETIC CARE AND MAINTENANCE

- All Vega Holster synthetic products will need minimal care and maintenance:
- Clean with a soft cloth and mild soap (don't submerge in water or other liquid).
 - If needed, you can use a soft bristle brush.
 - Allow to air dry naturally.
 - Don't use artificial heat to speed up the drying process.
 - Don't use Loctite or others.
 - Don't use solvents or chemical products.

HOLSTERS CARRY POSITIONS

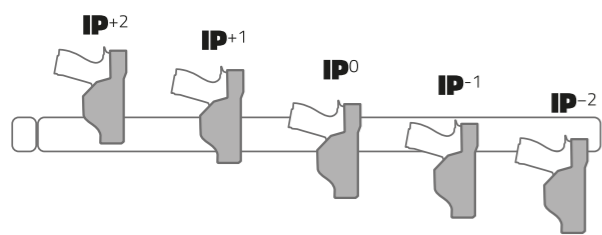

The most common positions depend on the different needs:

1 ON THE RIGHT SIDE (LEFT FOR LEFT HAND)	CONCEALMENT, DUTY OR MILITARY USES
2 CROSS DRAW ON THE LEFT SIDE (RIGHT FOR LEFT HAND)	CONCEALMENT USE
3 INCLINED ON THE BACK	CONCEALMENT USE
4 HORIZONTAL ON THE BACK	CONCEALMENT USE
5 INSIDE THE PANTS	CONCEALMENT USE
6 HORIZONTAL / VERTICAL / UPSIDE DOWN SHOULDER	CONCEALMENT USE DUTY OR MILITARY
7 ANKLE	CONCEALMENT USE
8 THIGH	DUTY, LAW ENFORCEMENT OR MILITARY USES
9 SIDE WITH A SPECIAL BELT SUPPORT THAT TAKE THE HOLSTER DETACHABLE FROM THE BODY AT THE RIGHT DISTANCE FOR A GOOD EXTRACTION	BODY ARMOUR OR TACTICAL VEST USES. DUTY, LAW ENFORCEMENT OR MILITARY USES.

CARRY SYSTEMS PROGRAM

Over the years, security operators have been faced with more demanding and more specific needs, particularly when it comes to how and in what position to carry a short weapon.

Vega has responded to those needs by developing a series of loops and platforms that we call V.C.S.P. "VEGA CARRY SYSTEMS PROGRAM".

The graph below illustrates the relation between the belt line and position of the weapon in the holster.

The IP (Identification of Position) is clearly shown for each loop system that appears in the following pages.

Identification of position is subdivided in 5 values:

IP+2 The weapon grip is very high in respect to the belt. This is especially useful for concealed carrying.

IP+1 The weapon grip is high in respect to the belt. This is useful when use occurs in a vehicle, where the weapon may press on the seat and this create a dangerous situation, or even hinder draw of the weapon.

IP0 The weapon grip is on the belt line. This system is used during normal duty in uniform, allowing a good draw and comfort.

IP-1 The weapon grip is below the belt line. This is ideal for a quick draw.

IP-2 The weapon grip is below the lower belt line. This is ideal for a semi thigh position and a quick and natural draw.

All Vega Holster loops and platforms can be assembled on all Vega holsters with the TRIPLE SCREW fastening system.

Some loop systems permit various holster cants and heights by means of screws, thus, in this case, the above value may differ.

Some loop systems permit varying the cant by means of a lever (without acting on the three fastening screws), this does not change the above value, but the features change (even if a weapon has a rotation angle of 90°, a holster with a value of IP0 or IP-1 will have the possibility of occupying less space when used in a vehicle). Some loop systems are at a certain distance from the body due to the use of tactical and/or bulletproof vests, or to make the draw quicker, or even to avoid accidental snagging while drawing the weapon (This is above all the case of uniformed agents). Other loop systems are closer to the body. These are preferable because of better concealment and an overall feeling of being in control of the weapon against the body.

Naturally, the operator may decide to use different loop systems on his holster (in the event that he does not want to use two different holsters), and choose which to use based on daily operational needs. As an example, the operator may be either on uniformed duty, or plain-clothes duty; in the first case, he will need a holster that can be worn with either a tactical or bulletproof vest while, in the second case, he will need a holster with good concealment.

The choice of a carrying system based on ones operational routine and needs is the first step to having the ideal holster.

WARNINGS

Great Care must be taken when handling, storing or moving firearms or when putting a pistol into or taking it out of the holster. Never put a loaded pistol into the holster without first checking that it fits in properly.

It is the user's responsibility to check personally that the firearm and the holster are compatible.

When placing the pistol into the holster (especially when the holster is new and besides more rigid) support the pistol hammer with your thumb finger and insert it carefully.

When choosing a product, consider first how you dress and how you carry your firearm and then choose the product best suited to your needs, in the appropriate material.

It is of vital importance that the holster and the firearm should be compatible. Before using your new holster, practise drawing the firearm: the holster will adapt better to the firearm and you will get to know the new product.

The firearm and its accessories should be regularly checked to see that they work correctly.

Holsters should never be altered.

Any alteration could cause accidents.

SAFETY GRADES

IT IS THE VEGA HOLSTER SYSTEM OF CLASSIFICATION IN "SAFETY GRADES" OF THE HOLSTERS USED BY POLICE AND IN SPECIAL OPERATIONS, IT IS BASED ON THE SECURITY SYSTEM'S REAL EFFICIENCY USED IN EACH MODEL, CONSIDERING TWO IMPORTANT ELEMENTS:

1) Mental factor: the reaction time in dangerous situation to release the firearm from the holster.

2) Mechanical factor: time necessary to bring the release operation to the end. Both can be improved through practise, good rule to use while handling a firearm, both depend on the quantity and type of the security systems put between the holster and the firearm. Higher is the safety grade, longer is the release time. It is very important to choose a holster with a Safety Grade level suitable with one's real needs.

Example: when an operator is on duty during special operations, it is very important to carry the firearm with the highest safety system, in spite of the release time. On the contrary when an operator faces imminent dangers a medium Safety Grade is recommended, because it is very important to release the firearm in a fast way.

SAFETY GRADE 1 The security system is always a thumb Snap lace. It could be subject to fortuitous release.

SAFETY GRADE 2 The security system doesn't allow fortuitous release and it is unlocked by an only action.

SAFETY GRADE 3 The security system/systems protects the operator from ill-intentioned person, who wants to tear his firearm and gives an excellent protection against fortuitous release. In this case there always are two safety systems acting on two different firearm's part and they can be unhooked and removed by different fingers of the hand (in case the release buttons are separated); or by one only finger, but with two separated and different movements (in case the release buttons are on the same side and near); or by one only finger with one only movement (in case the same lever button acts on both systems).

SAFETY GRADE 4 More security systems. Don't allow fortuitous release, allow a complete protection from ill-intentioned person who wants to tear the operator's firearm. The release is made with different actions in different time. Often a high Safety Grade (3° or 4°) can have more unlocked safety systems, so the same holster can change from Grade 4 to Grade 3 or from Grade 3 to Grade 2.

SAFETY SYSTEMS

VEGA HAS ALWAYS LOOKED FOR THE MARKET PRIORITIES AND SATISFY THE DEMANDS WITH NEW PRODUCTS. THAT'S THE REASON WHY WE CREATE THE BEST SAFETY SYSTEM SUITABLE FOR HOLSTERS.

VEGA CAMA X BACK & GO
The lever has the removable end part to be able to insert different types and dimensions of support. The system can be on Level II, which acts only on the jumper of the weapon, or Level III, which also acts on the upper part of the weapon (in this case both closures can be removed with the same lever).

VEGA THUMB CAMA
Safety system that is activated by a horizontal movement of the thumb, with the movement of the finger on the lever, the upper hood opens frontally and disengages the weapon. For reclosing the hood, manually place it in the upper block position.

VEGA THUMB ALL IN ONE CAMA
Double lock system: one acts on the upper part of the weapon and the second acts on the trigger guard of the weapon. The second one automatically engages when the weapon is replaced in the holster, while the first one is manually engaged. In order to release both systems (either simultaneously or singularly), simply act on one single lever positioned at the rear end of the holster (closer to the body), with a horizontal movement of the thumb.

VEGA INDEX CAMA
Safety system that is activated by a horizontal movement of the index finger. With a movement of the finger on the external lever, the pivot that blocks the trigger guard disengages and the weapon can be drawn. The weapon locks by simply replacing it in the holster.

VEGA THUMB + INDEX CAMA
Double lock system: one acts on the upper part of the weapon and the second acts on the trigger guard of the weapon. The two are independent of each other. The upper one is activated by a horizontal movement of the thumb. With pressure on the lever, the upper hood opens frontally and disengages the weapon. For reclosing the hood, manually place it in the upper block position. The lower one is activated by a horizontal movement of the index finger. With a movement of the finger on the external lever, the pivot that blocks the trigger guard disengages and the weapon can be drawn. The weapon locks by simply replacing it in the holster.

VEGA "AUTOMATIC PUSH AND GO"
Top safety system, push the internal lever and the safety lace go in front, the lace return in safety position manually.

VEGA STOP SNAP
It's a safety blocking of the thumb snap, a safety cap that slide on the plastic lace blocking the snap in the up position and releasing in the down position.

VEGA "PUSH & FRONT"
It's a simple and instinctive semiautomatic safety system that is removable with thumb pressure and insertable with rotation of the plastic lace.

VEGA "PUSH DOWN"
Safety mechanism that work on the trigger guard. The safety lock is automatically activated when the weapon is inserted into the holster and deactivated pushing the inside release lever.

VEGA PULL SIDE
It's a safety system studied to replace the standard security lace, Reinserting the Firearms into the holster the safety catch which acts on the trigger guard is automatically reactivated; to pull out the holster simply pull side the inside lever, it is possible to insert another level of safety with an amovable catch that block the safety lever (it is possible to use the holster with only one safety system for to take out the catch: it is necessary to unscrew the first screw and remove the block cylinder).

"ACE FRONT STOP"
Safety system that automatically enters the insertion of the weapon in the holster and can be unhooked by the thumb of the hand, moving the lever placed between the weapon and the operator's side, in the rear direction (towards the handle). The lever has the removable end part to be able to insert different types and dimensions of support.

ADJUSTABLE SAFETY PUSH & FRONT
Semi-automatic safety system that disengages by placing pressure and pushing forward with the thumb on the surface situated on the external part of the "Rotating lace" and is engaged by manually placing the lace on the weapon hammer. It is possible to block the system by sliding a button which, when moved forward, prevents the lace from sliding downward. The system it can also be adjusted on the front with three slots for to carry the lace near or distant to the weapon hammer.

VEGA PULL FORWARD
It's a manual safety system: the attachment-release is controlled by a lever positioned under the grip. You can block the trigger guard moving the lever back ward; to release it is simply move the lever forward.

GENERAL FEATURES

- Compatible holsters for weapons with Red Dot.
- Retention Screw to adjust the holster retention on the firearm.
- Adjustable Thumb Snap lace to adjust the safety lace according to the firearms.
- Vega Comfort Form is a particular molded system which makes a more comfortable fit.
- Safety Snaps are patented security snaps to release only one side.
- Three way safety buckle. It is released by simultaneous activation of three buttons.

- Anti slip ribbon/lace used particularly in thigh system. The barrel-sight guide allows a free draw and protects the pistol sight.
- The barrel-sight guide allows a free draw and protects the pistol sight.
- Thermo molding directly the firearm to get perfect holster fit.
- All the Vega Holsters are available in left and right hand except few models.
- Adjust angle and removable loop. This Holsters mounts adjust angle and removable belt loops by screws.
- Velcro Modular System: accessories with Velcro back panel, it is possible to mount on compatible bags or induments, it is possible to change the pockets according to the different operative requirements.
